Hello Nate,

Thank you for your interest in our products. At this time we don't plan on developing one for the Transit. We have had customer install them in their short wheel base Transit with come custom work. Feel free to take a look at the instruction sheets if you might think it would work for you.

Thank you,

Sales Representative

Body:

Hi,

I'm inquiring about the use of the sprinter trunk:

<https://vancompass.com/products/van-compass-rear-storage-trunk-2007-sprinter>

Specifically, can it be used for on a long wheelbase extended transit. Its not advertised for that application, but I see that Van Compass has installed one in a non-extended transit (on the overlander forum).

Alternatively, do you guys have a transit version planned?

Thanks,

Nate
